

Dragon's Den

The Dragon's Den at the HTMR members annual meeting has the aim of being engaging, educational, and fun. It is a different method for presenting ideas to the Hub Network that will challenge the delegates and encourage discussion and partnerships.

The format of the Den is designed to improve collaboration in academic teams, and will focus the audience's minds on the opportunities and the framework for the use of HTMR Network funds.

Dragons

MRC Clinical Trial Service Unit (CTSU) Hub	Tim Sprosen
All Ireland Hub	Gillian Shorter
London Hub	James Carpenter
MRC Biostatistics Unit (BSU) Hub	Jack Bowden
ConDuCT II Hub	Tim Peters
North West Hub	Richard Emsley

Pitches

Hub	Title	Presenters
ConDuCT II	Designing trials to better understand the relationships between symptom severity and the effectiveness/cost-effectiveness of treatments	Nicky Welton, Daphne Kounali, and Will Hollingworth
North West	Re-engineering Recruitment prediction	Carrol Gamble and Chris Bray (Oxford)
Biostatistics Unit	Bandit based designs for trials in rare diseases	Sofia Villar
London	Improving clinical trial data quality - statistician's input	Gordana Jovic, William Craig, Andrew Embleton
