Design of the ICECAP-A project

- Phase 1
 - in-depth interviews with adult individuals to develop conceptual attributes
- Phase 2
 - semi-structured interviews with adult individuals to check meaning and determine language for the measure.
- Phase 3
 - best-worst scaling (BWS) valuation.
- Phase 4
 - early assessment of validity and reliability.

Final conceptual attributes for capabilities

1. **Stability**
2. **Attachment**
3. **Achievement**
4. **Autonomy**
5. **Enjoyment**

Theme 1 – Stability

- Feeling settled, safe, lack of uncertainty:

*...my health broke down again ... which came as a shock... I had to give up work immediately ...and it cast a long shadow because it's always there in the background, you never know when it might jump on you. So you live with uncertainty.
[Female, 78]*

- Key influences: friends, surroundings, health, religion, community.
